MEMORANDUM FOR: Deputy Director for Administration
 Deputy Director for Operations
 Deputy Director for Science and Technology

FROM:
 Director of Information Resources

25X1

SUBJECT: Access to SAFE by the DA, DO, and DS&T

1. There has been a longstanding demand for SAFE services by Directorates other than the DI, and this demand is expected to increase. Because we are currently constrained to a maximum number of SAFE users--and we expect no change in that total number until sometime in 1987--we must impose a ceiling on this service for each Directorate. Rather than handling new requests for SAFE access on a case-by-case basis, we propose that each Directorate manage its own accesses within a prescribed limit. This will allow each Directorate to establish its own priorities for this critical and scarce resource.

2. The following is the current allocation of SAFE userids granted to other Directorates and the maximum number of SAFE userids for each. Once this maximum is reached and new requirements surface, each Directorate will be asked to redistribute the SAFE userids within its own allocation.

	<u>Current Allocation of SAFE Userids</u>	<u>Maximum Allocation of SAFE Userids</u>
DS&T		
DO		
DA (Non-SAFE Development)		
TOTAL		

25X1

3. Users of the SAFE system in each Directorate will be considered the same as any DI SAFE user. Your people will receive training and the full set of SAFE support services available to the DI.

SUBJECT: Access to SAFE by the DA, DO, and DS&T

4. We recognize that these ceilings impose constraints that could adversely affect the work in your Directorate. We, however, have no choice in view of the current limitations on SAFE access. We will notify you as soon as we are able to provide additional accesses to other Directorates. Any questions regarding this policy may be directed to Chief of the SAFE Support Branch.
